ENRICO ZANOLLA

SENSORY-HIGH DESIGNS

THE CREATOR

Ever since his graduation in architecture from IUAV (University in Venice) in 2004, Enrico Zanolla has carved out an impressive career for himself in design and architecture. Through the years, his name has been constantly linked with almost all international design fairs, exhibitions and he has even tied up on several international collaborations. In his own words, "My works are strictly linked to the sensorial glorification and style..."

...AND HIS CREATIONS

'Sensorial', that's how one could best describe Enrico's style of design. His particularly keen interest in shapes, colours, textiles...all comes through beautifully in his designs. With sleek as his core focus, the designer integrates the above elements in unimaginable ways. Be it the tuft of the Clamp lamp (top left, far above), or the simple form of Cacnews, the newspaper/magazine holder (above left), Enrico surprises us each time!

ENRICO IS A MASTER WHEN IT COMES TO FORM. WE SEE THIS IN HIS LIGHTS, FURNITURE AND ACCESSORY DESIGNS.
